## About this Course

AI is not only for engineers. If you want your organization to become better at using AI, this is the course to tell everyone--especially your non-technical colleagues--to take.

In this course, you will learn:

- The meaning behind common AI terminology, including neural networks, machine learning, deep learning, and data science
- What AI realistically can--and cannot--do
- How to spot opportunities to apply AI to problems in your own organization
- What it feels like to build machine learning and data science projects
- How to work with an AI team and build an AI strategy in your company
- How to navigate ethical and societal discussions surrounding AI

Though this course is largely non-technical, engineers can also take this course to learn the business aspects of AI

### Shareable Certificate

Earn a Certificate upon completion

### 100% online

Start instantly and learn at your own schedule.

### Flexible deadlines

Reset deadlines in accordance to your schedule.

### Beginner Level

#### SKILLS YOU WILL GAIN

Workflow of Machine Learning projects

AI terminology

AI strategy

Workflow of Data Science projects

**Approx. 6 hours to complete**

#### English

Subtitles: Chinese (Traditional), Arabic, French, Chinese (Simplified), German, Thai, English, Spanish, Japanese

## Syllabus - What you will learn from this course

WEEK

1

2 hours to complete

What Is AI?

9 videos
